| Nokia Corporation et al | | | | | |
| Nokia Corporation et al | | | | | |
| 1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of | | | | | |
| Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of | | | | | |
| 3. This report is also accompanied by ANNEXES, comprising: a. (sent to the applicant and to the International Bureau) a total of | | | | | |
| 3. This report is also accompanied by ANNEXES, comprising: a. (sent to the applicant and to the International Bureau) a total of | | | | | |
| a. (sent to the applicant and to the International Bureau) a total of sheets, as follows: sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) (sent to the International Electronic carrier(s)) (sent to the International Electronic Carrier(s)) (sent to the International application) (a) | | | | | |
| sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). Sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. 1 and the Supplemental Box. Sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. 1 and the Supplemental Box. Sheets which supersede earlier sheets, but which this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). Sheets which supersede earlier sheets, but which this Authority (see Rule 70.16 and Section 607 of the Rule 10 see Section 802 of the Supplemental Box. Sheets which supersede earlier sheets, but which this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). Sheets which supersede earlier sheets, but which this Authority (see Rule 70.16 and seminations seed Section 802 of the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). At This report contains indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). Box No. I Basis of the report Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). Box No. I Basis of the following items: Box No. I Basis of the report Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). Box No. I Basis of the following items: Box No. I Basis of the report Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). Box No. I Basis of the report Box Relating to Sequence Listing (see Section 802 of the Administra | | | | | |
| and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. This report contains indications relating to the following items: Box No. I Basis of the report Box No. II Priority Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability Box No. IV Lack of unity of invention Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement Box No. VII Certain defects in the international application Box No. VIII Certain observations on the international application | | | | | |
| sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. This report contains indications relating to the following items: Box No. I Basis of the report Box No. II Priority Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability Box No. IV Lack of unity of invention Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement Box No. VI Certain defects in the international application Certain observations on the international application | | | | | |
| beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) | | | | | |
| b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) | | | | | |
| , containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. | | | any table(s) related to the sequence listing (specify): | | | | | |
| * | If item | 4 applies, some or all of those sheets may be marked "superseded." | | | | | |

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/IB2003/006124

| Box No. V Reasoned statement under Article citations and explanations support | | | cle 35(2) with regard to novelty, inventive step or industrial applicability; orting such statement | |
|---|---------------------------|------------------|---|--------|
| 1. Statemen | t | | | |
| Nove | elty (N) | Claims Claims | 1-16 | YES NO |
| Inver | ntive step (IS) | Claims Claims | 1-16 | YES NO |
| Indus | strial applicability (IA) | Claims Claims | 1-16 | YES NO |

2. Citations and explanations (Rule 70.7)

Documents cited in the International Search Report:

D1: WO0203600 A1
D2: WO03105394 A1
D3: WO03077464 A1
D4: US6175560 B1
D5: US2003012165 A1
D6: WO0217548 A1

The cited documents represent the general state of the art. The inventions defined in claims 1-16 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method and network for decreasing the transmission delay in a multichannel data transmission of physical layer frames using hybrid automated repeat request signalling. Therefore, the claimed inventions are not obvious to a person skilled in the art.

Accordingly, the inventions defined in claims 1-16 are novel and are considered to involve an inventive step. The inventions are industrially applicable.

Claims

5 1. Method for decreasing a transmission delay in a multi-sub-channel data transmission of physical layer frames using hybrid automated repeat request with acknowledgement signaling, wherein said method comprises:

determining, if no physical layer frame needs to be transmitted in a provided sub-channel, determining, if there is a physical layer frame of another sub-channel with pending acknowledgement,

selecting said physical layer frame with pending acknowledgement, if no physical layer frame needs to be transmitted in the provided sub-channel, and transmitting said selected frame in said provided sub-channel.

- 2. Method according to claim 1, further comprising: determining, if there are physical layer frames with pending acknowledgement that have been previously selected, and selecting another physical layer frame with pending acknowledgement that has not been previously selected.
- 3. Method according to claim 1 or 2, wherein said physical layer frame with pending acknowledgement, is selected, wherein said pending acknowledgement is pending for a longer time period than the acknowledgement any of the other frames.
- 4. Method according to anyone of the preceding claims, wherein said physical layer frame with pending acknowledgement is selected, wherein said pending acknowledgement is pending for a shorter time period than the acknowledgement of any of the other frames.
 - 5. Method according to anyone of the preceding claims, wherein said physical layer frame with pending acknowledgement, is randomly selected.
 - 6. Method according to anyone of the preceding claims, further characterized by: determining a threshold number, based on the number of sub-channels in said multi-sub-channel data transmission, determining the number of physical layer frames to be transmitted in all sub-channels,

35 and

30

controlling the transmission power of the transmission of the physical layer frames, on the basis of the relationship between said threshold number and said determined number of physical layer frame.

- 7. Method according to claim 6, wherein said controlling of the transmission power comprises: increasing the transmission power for the transmission of the physical layer frames, if said threshold number exceeds said determined number of physical layer frames to be transmitted.
- 10 8. Method according to claim 6 or 7, further comprising determining an error rate, and wherein said determining of said threshold number, is also based on said determined error rate.
 - 9. Method according to claim 8, wherein said controlling of said transmission power, is also related to said determined error rate.
 - 10. Method according to anyone of claims 6 to 9, wherein said controlling of the transmission power comprises:

decreasing the transmission power, if said determined number of physical layer frames to be transmitted exceeds said threshold number.

- 11. Method according to anyone of the preceding claims, wherein said multi-sub-channel data transmission is an uplink of a dedicated transport channel in universal terrestrial radio access.
- 12. Computer program product comprising program code means stored on a computer readable medium for carrying out the method of anyone of claims 1 to 11 when said program product is run on a computer or network device.
 - 13. Computer program product comprising program code, downloadable from a server for carrying out the method of anyone of claims 1 to 11 when said program product is run on a computer or network device.
 - 14. Wireless communication network device capable of decreased transmission delay in a multisub-channel data transmission of physical layer frames using hybrid automated repeat request with acknowledgement signaling, wherein said network device comprises:
 - a processing unit,

15

20

30

35

- a storage, connected to said processing unit,
- a radio interface for said multi-sub-channel data transmission of physical layer frames

using hybrid automated repeat request, wherein said radio interface is connected to said processing unit and to said storage, and wherein said radio interface comprises a transmitter and a receiver,

characterized by

5

10

15

20

25

30

- a first component for determining, if no physical layer frame needs to be transmitted in a provided sub-channel,
 - a second component for determining, if there is a physical layer frame of another subchannel with pending acknowledgement,
 - a third component for selecting, said physical layer frame with pending acknowledgement, if no physical layer frame needs to be transmitted in the provided subchannel, and
 - a fourth component for transmitting said selected frame in said provided sub-channel, wherein said first component said second component said third component and said fourth component are each connected to said radio interface, and wherein said first component is connected to said second component, said second component is connected to said third component, and said third component is connected to said fourth component.
- 15. Wireless communication network device according to claim 14, further characterized by a component for determining a threshold number, based on the number of sub-channels in said multi-sub-channel data transmission, wherein said component for determining said threshold number is connected to said radio interface;
 - a component for determining the number of physical layer frames to be transmitted in all sub-channels, wherein said component for determining said number of physical layer frames is connected to said radio interface, and
 - a component for controlling the transmission power of said transmitter for the transmission of the physical layer frames, in dependence of the relationship between said threshold number and said determined number of physical layer frames, wherein said component for controlling is connected to both of said components for determining and to said radio interface.
- 16. Wireless communication network device according to anyone of claims 14 or 15, characterized in that said network device is a mobile user terminal device.
